TEAMWORK

An essential part of your care

At Rocky Mountain Center for Reproductive Medicine, we are committed to your health and the successful realization of your expectations and dreams. We welcome the opportunity to work with our respected colleagues in the medical field on a referral basis. When working on this basis, it is our ultimate goal to return the patient to her referring physician with a successful outcome or pregnancy.

Our approach is a continuity of patient care that encompasses each member of the clinical staff as well as the administrative staff. We believe this approach provides our patients with a number of advantages, one of these being a closer doctor-patient-staff relationship than typical, which in turn assists us in becoming more familiar with you and your needs in every respect.

Our clinical staff not only provides a high level of skill, years of experience and vast knowledge of Infertility and women's health issues, but the care they provide is characterized by empathetic and personal attention each patient receives. The center is staffed with an Embryologist, two Certified Physician Assistants, and four Registered Nurses.

Our office staff is available to assist you in a number of areas relevant to your total care. It is our purpose to provide you our personal, yet professional, attention in scheduling appointments, maintaining accurate records, and coordinating all financial matters associated with your visit.

If you have questions or would like to schedule a new patient appointment, give us a call at (970) 493-6353 OR (800) 624-9035.
